-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 appears to claim a U-shaped clamp body, which rotates to an L-shaped clamp arm; however, the claim then attempts to claim a pair of arm parts with L-shaped bent shoulder rotatable by a clamp arm. It is not clear if there is a U-shaped member and a pair of arm parts with L-shaped bent shoulder or if the U-shaped member is made of a pair of arm parts with L-shaped bent shoulders. It seems that from the drawings the U-shaped member is made up of a pair of arm parts with L-shaped bent shoulders. Until further clarification, the claim has been examined as the U-shaped member being made up of a pair of arm parts with L-shaped bent shoulders. Further, it is not clear what is the "one clamp arm" and what is the "other clamp arm". Until clarification, the claim has been examined as the pair of L-shaped arms making up the U-shaped member, as being the "one" and the "other" clamp arms.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected, as best understood, under 35 U.S.C. 102(b) as being anticipated by DE 3941935. DE 3941935 discloses the use of a clamp including a U-shaped body including a pair of L-shaped clamp arms (1,2) rotatably connected as at (19), and a clamp lever (3) that presses one clamp arm (1) against another clamp arm (2). In reference to claim 2, the clamp arms (1,2) are riveted as at (19) to rotate and are riveted as at (20) to rotate with the clamp lever (3). Regarding claim 3, the clamp body extends at a "substantially" straight manner as at (15) to an opening (not labeled, but between the two clamp arms 1,2). In reference to claim 4, the L-shaped arm parts (1,2) have a raised surface (16) at the opening and curve outwardly as at (18).

Conclusion
